

Connecting to State of Indiana AnyConnect VPN for the First Time

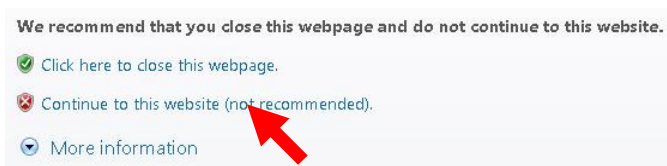

Please click the link below to access the AnyConnect VPN page:

<https://vpn.iot.in.gov>

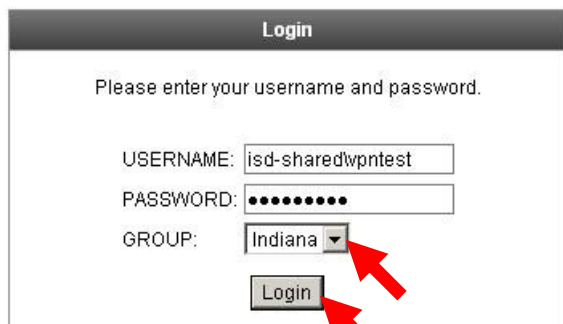

One of the following connection warnings will be displayed. Click “Yes” or “Continue to this website (not recommended)” on the certificate warning depending on which warning you receive:

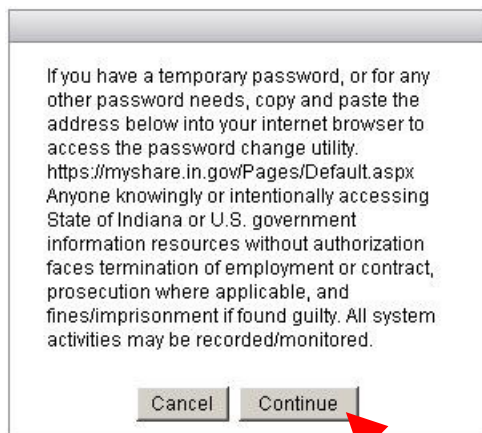

or

Ensure “Indiana” is showing in the GROUP dropdown. Enter your username in the form of DOMAIN\Username (ex: ISD-SHARED\vpntest) and your password. Click “Login”:

A login form titled "Login". It says "Please enter your username and password." Below this are three input fields: "USERNAME:" with the text "isd-shared\vpntest", "PASSWORD:" with masked characters "••••••••", and "GROUP:" with a dropdown menu showing "Indiana". Below the dropdown is a "Login" button. Two red arrows point to the "GROUP:" dropdown and the "Login" button.

Click “Continue: on the banner page:

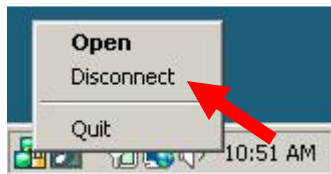

A banner page with a light gray background. It contains the following text: "If you have a temporary password, or for any other password needs, copy and paste the address below into your internet browser to access the password change utility: https://myshare.in.gov/Pages/Default.aspx Anyone knowingly or intentionally accessing State of Indiana or U.S. government information resources without authorization faces termination of employment or contract, prosecution where applicable, and fines/imprisonment if found guilty. All system activities may be recorded/monitored." At the bottom are two buttons: "Cancel" and "Continue". A red arrow points to the "Continue" button.

The VPN appliance will automatically detect and install the proper AnyConnect VPN Client for your system. NO USER INTERVENTION WILL BE REQUIRED DURING THIS PROCESS.

After installation and connection is complete, you will see a new icon in your system tray near your clock:

To disconnect, you may right click the icon and choose “Disconnect”:

Or you may double-click the icon, choose the “Connection” tab and then click “Disconnect”:

The icon will stay in your system tray so that you can reconnect when needed. You may also visit the webpage to reconnect. Client installation will only occur on the first connection. Subsequent connections will detect the installed client and connect you immediately.
